N is written double or single in monosyllables; as, fenn or fen a fen, v. L. 400.

N, from ne not, has a negative signification, not only in A.-S. but in other languages; as, Lat. *nullus any one, nullus no one*; Eng. one, none; ever, never; aught, naught; either, neither; A.-S. an one; nan no one: aht aught, any thing; nabt naught, nothing; æfer, æfre ever; næfre never. If the words which prefix n begin with h or t, these letters are dropped; as, nabban [ne-habban] not to have, næs, [ne wæs] was not; but w is changed into y; nylan [ne willan] to be unwilling. A; adv. [Plat. ne: Dut. neen: Ger. nein, nāb, nee: South Ger. naa, nua: Moes. ne, ni: Dan. Sued. nej: Icel. nei: Pol. ni: Wel. na, nād no, not: Russ. ne: Pers. Zend. & neh:

Sans. na] No, not; non:—Na na no more; non amplius, Ps. 61, 2. Ne þe læs *nevertheless*; nihilominus. Na leng no longer, L. Ps. 61, 2.—Two or more negatives are often used in A.-S. Na ne feoll *non cecidit*, Mt. 7, 25. Na ne sceoldon *we should not*, Cd. 222. Ne eom ic na *non ego*, Jn. 1, 20. Ne ge-seah næfre nan man God *nul-lus homo unquam vidit Deum*, Jn. 1, 18. Port.* monja *f.* This word is old and was used by *St. Hieronymus* to designate a nun. *Vossius* thinks it is an *Egyptian* word; signifying a virgin; others derive it from the *Grk.* νύμφη, νύμφη a nun; but being in earlier time a title of respect, given to old people, this derivation is not sufficient. Nonnones or nonnanes was in the *Lat. mid.* the name for old poor persons, provided for or maintained by the Church; *Papias* says, "nonnos vocamus majores ob reverentiam, nam intelligitur paterna reverentia;" and in the rule, or Institution of *St. Benedict* it is said, "Juniores autem Priores suos nonnos vocent, quod intelligitur paterna reverentia." In the same manner as old venerable monks, out of respect, were called *Patres fathers*, they also received the title Nonnos, and the old sacred virgins nonnas, and both together in the *Latin* of the middle age, were named nonnones and nonnanes. This word was often prefixed to proper names; as for instance, Nonnus *Fridericus monachus.* The *It.* nonna *f.* signifies grandmother, and nonno *m.* grandfather] A NUN; nonna, monialis:—Nunnan age monialem habet, *L. Saxon money was sometimes reckoned by pennies, as the French money is now by livres. *Mann.* says, "the Saxon penny was equal to 8 pence of the present currency," but if a mancus (v. mancos) be 6 shillings or 72 pence in our money, and only 30 Saxon pennies, it follows that a Saxon penny was not quite 2½d. This was the greater penny, 5 of which made a shilling. There was also a smaller penny, about the value of our present penny, 12 of which made a shilling; denarius Anglo-Saxonicus, quorum singulus tres nostros valebat. 2. *A shekel*; siclus. 3. *A pound weight*; as:—1. In earlier times all silver and copper money was weighed, hence the appellation pound*] 1. *A pound weight; pondo, libra.* 2. *A POUND, a quantity of money; mina, v. mancos.* 3. *A talent; talentum.* The Saxon pound was used as an imaginary value of money, but there has been a variety of opinions about its value. We have proof, from *Domesday*, that in the time of the Confessor it consisted of twenty *solidi* or *shillings*. But *Dr. Hickes, Dis. Ep. p. 111.* contends that the Saxon pound consisted of *sixty shillings*, because, by the Saxon law in Mercia, the king's were-geld was one hundred and twenty pounds, and amounted to the same as six thegns, whose were was twelve hundred shillings each, *L. Wilk. p. 72.* And certainly this passage has the force of declaring that the king's were was seven thousand two hundred shillings, and that these were equivalent to one hundred and twenty pounds; and, according to this passage, the pound in Mercia contained *sixty shillings*. Other authors, as *Anden, Spelman, and Fleetwood* assert that the pound had but *forty-eight shillings*:—1. *An pund deorwyrðre ealfe, Jn. 12, 3. Pund bu-gan gewið LXXX pene-um læsse þonne pund wæ-tes, W. Cat. p. 179.* 2. *Pyn-und gestrynde tyn pund tua mina lucrifecit decem minas, Lk. 19, 16. Nimað þæt pund fram hym, and syllað þam þe*

SACU; g. d. ac. e; pl. nom. ac. a;  
g. ena; d. um; f. [Plat. sake f:  
Dut. zaak f: Frs. sek f: Ger.  
sache f: Sak sack a lawsuit.  
In an old document of king  
Louis and Lothar of the ninth  
century, sachu signifies landed  
property: *Isd. Tat. Ot. sahba*,  
sacha, like the A.-S.: *Ker.*  
secho quarrels: *Dan. sag c*:  
*Swed. sak f*: *Icel. sök f.* court  
of justice, jurisdiction, a law-  
suit. The derivation of this  
word has been a stumbling-  
block for nearly all etymolo-  
gists. *Adel.* considers it as  
the intensive of the Ger. sage f.  
a saying, a talk, and sagen to  
say, signifying originally a  
clamour, dispute, quarrel;  
and, in a more extended sense,  
any kind of speech and its  
object. Synonyms in the Ger.  
and other languages confirm  
this derivation. The Ger. ding  
thing signifies, in its most  
extended sense, all that is  
existing; but, originally it  
designated altercation, cavilling,  
wrangling, as well as speech in  
general. The Lat. causa is  
derived from causari. Ger.  
klagen to complain, which, like  
the Ger. kören and kösen, in  
earlier times signified in gene-  
ral to speak. The It. cosa,  
and the Fr. chose, derived from  
causa, signify any matter or  
any thing. The Lat. res be-  
longs to the root of the Ger.  
rede speech, recht right, raus-  
chen to rush. *Kero* translates  
res by rachono, which antiqua-  
ted word belonging to the Ger.  
rechen, reden is the root of  
Ger. rechnen to calculate. The  
Old Swed. sak, the Icel. sök f.  
signifies both crime and im-  
peachment or punishment, and  
*Tat.* uses sahba to designate a

crime, *Adl.*] 1. Strife, conten-  
tion, dispute, sedition, a crime  
of any sort; jurgium, conten-  
tio. 2. A cause or suit in

m. a tribute.—sceat a part,

tribute, treasure, gift; pecunia,

thesaurus, lucrum, munus.

2. A definite quantity or piece

of metal in an uncoined state,

about the value of our penny.

In the time of Ethelbert, the

scæt was the twentieth part

of a shilling. His laws en-

join a penalty of twenty scyl-

lingas for the loss of the

thumb, and three scyllingas

for the thumb-nail. It is

afterwards declared that the

loss of the great toe is to be

compensated by ten scyllingas,

and the other toes by half the

price of the fingers. It is

immediately added, that for

the nail of the great toe

thirtysceattas must be paid to

bot, L. Ethelb. W. p. 6.—About

three centuries later, the scæt

appears somewhat raised in

value, and to be like one

of their smaller pennies; for

the laws of Æthelstan declare

XXX þusend sceatta, and þat

bið ealles CXX punda thirty

thousand scættas to be 120

pounds, L. Lund. W. p. 72, 10.

This gives two hundred and

fifty sceattas to a pound, or

twelve and a half to a scyl-

ling. Perhaps, therefore,

the sceat was the smaller penny, a little less than the value of the present English penny; and the pening, properly so called, was the larger one, the intrinsic worth of which was about 2½d., v. peneg. The sceat and scylling seem to have been the names of the Saxon money in Pagan times, before the Roman and French ecclesiastics had taught them the art of coining, v. *Mr. Turner's Hist. of A.-S.* vol. ii. p. 474: *Monetæ Anglo-Saxonicae species*:—1. sql, skel to weigh: *Lat. Mid.* sicle: *Fr.* sicle the fourth part of an ounce, and observe that payments were originally made by weight, as they are still in some countries. Junius refers shilling to the old skella to sound. He pretends that all thicker coins were called shilling in opposition to the coin made of thin plated metal, or bracteates, which had no sound. Wach. thinks that the *Moes.* skula reus, the *A.-S.* scyldig is the root of shilling, originally used for a fine. Other etymologists derive this word from the *Ger.* schild shield, and thus shilling, or rather shildling, would signify a coin stamped with the arms of the prince, or any other person who has the right or privilege of coinage. Frisch derives shilling from the *Lat.* solidus. Ihre, whose views Adelung most approves, thinks that the original signification of shilling is the *Ger.* scheide münge small money, *Swed.* skilje mynt, *Dan.* skille mynt. This opinion is confirmed by the circumstance that the oldest larger coins were marked by a deep stamped or impressed cross, in such a manner that they could be easily broken into two, three, or four pieces; the different value of shillings is thus easily explained.—scylan to divide, or sceale a balance, scale] 1. It is generally found in composition, even in the most ancient writings. In *A.-S.* astepte is met with. About the derivation etymologists differ very much. *Frisch.* refers it to the *Bohm.* stipeni ingraft-

ing; stipiti to plant; and according to him, stief signifies a person giving assistance to another. The *Zittavian* chronicles call churchwardens stiefväter step-fathers; and the bride-maid stiefschwester the bride's step-sister of the bride, which favours the opinion of *Frisch.* *Adelung* thinks the stief signifies something not genuine, in opposition to the genuine and true; but he confesses that, from the great antiquity of this word, its derivation is very difficult. *Jur.* with whom *Ihre* agrees, regards this word in the most reasonable manner to the *A.-S.* steop and the *Old Ger.* stufan bare; to which the *Icel.* stamputa, priore; may perhaps be added.—*A.-S.* child] A STEP-CHILD, aphan; orbatus parente. aphanus, pupillus, *Ex.* 22: *Deut.* 10, 18.

TYN, ten, tin [Plat. tien: is Hanover, tein: Dut. ten: Frs. tian: Ger. zehen, zehn: Old Ger. zehun, zehan, zehcin: Moes. taihun: and in compound words, taihund, zehund ten: Dan. ti: Sued. tio: Icel. tíu. Jäkel, is the German Origin of the Lat. decem p. 98, The origin of Ger. zehen, Lat. decem, is the best explained by the Old Ger. and Moes. tai hund or hend; the

is the old article *thai* the; and hand, hend hands, both the hands or ten fingers, by which they numbered or counted, as children still do. Thus originated our decimal system. The Roman numerals seem to allude to this origin. V represents one hand expanded; X represents both the hands. From *taihend*, the Ger. formed ten by contraction, which afterwards, by their predilection for hissing sounds, was changed in *zehend*, *zehen* ten. In Lat. the deep guttural h, changed into c or k, and thus formed *decem*. All the other numbers can be explained in the same manner, if we consider that the old c was properly the Grk. γ, and thus easily changed into g. It is for this reason that we sometimes find *vicesimus* and *vigesimus*. Thus the Lat. *vi-ginti*: Teutonic, *twig-ti-gunds* or *honds* two times the hands, twenty. In some old inscriptions *viginti* is written *biginti*; in Teutonic *twins-ti-gund* twenty. *Trigint-a*, Teutonic *trins-ti-gon*—disthree times the hands, thirty, &c. *Centum*, cent. in Teutonic, *taihend*, *tehund* ten times the hands, or  $10 \times 10 = 100$ . By the quick pronunciation of this long word, the first syllable was easily passed over, and the last contracted; thus by adding t, the Ger. *hundert*, Eng. *hundred*, were formed.—Tooke gives the following derivation.—*tyn* included, concluded, from *ynan* to enclose, shut in; because with ten numeration is closed, and a new series commences; as, ten and one, ten and two] *TEN*; *decem*:—Gif *ær beoð tyn*, Gen. 18, 32. *Donne byð heofona rice gelic am tyn fæmnum*, Mt. 25, 1. *le leofode an hund wintra and tyn gear ille vixit centum annos et decem annos*, Gen. 50, 2. *Nigon hund wintra*

USA, wusa, an. [In peopling a  
country, the new comers often  
take the appellatives of the old  
inhabitants for proper names.  
It is thus with the names of  
rivers; hence it is that the  
Britons, at their first coming,  
denominated so many rivers in  
England, Asc, Esc, Isc, Ose,  
and Usc, which the English  
altered into Ax, Ex, Ox, Ux,  
Ouse, in Axley, Axholm, Ex-  
mouth, Exeter, Uxbridge.  
This is the varied orthography  
of the same word which among  
the Old Britons signified water,  
as it does now in the Highlands  
and in Ireland, *Baxter's Gloss.*  
*Brit.* p. 264.] The river OUSE,  
Ose, Usc, Isc; the name of many  
rivers, but especially the Ouse  
which rises in Northampton-  
shire, runs through Bedford-  
shire, Cambridgeshire and  
Norfolk, and enters the sea at

**WER, were, were, es; m. [Fra. weregeld n: Ger. webrgeld n: Old Ger. wer, were] A fine for slaying a man, the price or value of a man's life; capitis æstimatio sive pretium quo vita cujusque apud Anglo-Saxones pro vario suo statu, ordine, et conditione censebatur. Every man was valued at a certain sum, which was called his were, and whoever took his life was punished by having to pay this were to the family or relations of the deceased. The were was therefore the penalty by which his safety was guarded and his crimes prevented or punished. If he violated certain laws, it was his legal mulct; if he were himself attacked, it was the penalty inflicted on others. Hence it became the measure and mark of a man's personal rank and consequence, because its amount was exactly regulated by his condition in life:—Gif his wer bið twelf hund scil if his were be 1200 shillings, L. In. 19. Gif his were bið, &c. if his were be, &c., L. In. 32. Gilde þone wer, butan wite pay the were, without wite, L. Alf. pol. 32. Twelfhyndes mannes wer is twelf hund scyllynga. \* In expressing the sounds of *th*, the Anglo-Saxon orthography was more consistent than the present English. We now use *th* to represent two sounds, as heard in the words *thing* and *smooth*; the Anglo-Saxons, with greater propriety, used two distinct characters to denote these two separate sounds. The *hard* or *sharp* sound of *th* heard in *thing* is represented in Anglo-Saxon by þ, þ *th*; and the *soft* or *flat* sound, as found in *other*, *brother*, is denoted by ð, ð *dth*. Þ or þ *th*, representing the hard or sharp sound, is used in Anglo-Saxon at the *beginning* of *words and syllables*; as, þing *thing*, þeþencan *to bethink*. Ð or ð *dth*, denoting the *soft* or *flat* sound, is employed at the *end of words and syllables*; as, sôð *sooth*, brôðer *brother*. This is the plan adopted in the present work. As the scribes of the more recent Anglo-Saxon MSS. have not been very precise in the use of þ *th*, ð *dth*, it will be desirable to show the reasons by which the sounds and the use of these characters have been determined.

It is evident that þ *th* is the *hard*, and ð *dth* the *soft* sound; 1st, Because as Ð is clearly taken from D, it is most probable that Ð represented the sound which comes nearest to D: it is also evident, on the other hand, that þ, as well as the Icelandic þ are taken from the Runic Þ, and, therefore, it probably denoted the same hard sound. 2ndly, Because ð *dth* is found so frequently at the end of a syllable, and between two vowels, where the softer sound is still retained in English, and where, according to the old orthography, ð *dth* is found in Icelandic and in Ger. and Dan. a mere *d*; as, sôð, Eng. *sooth*, and Icel. saðr; oðre, Eng. *others*, Icel. aðrir: A.-S. brôðer: Eng. *brother*: Ger. bruder: Dan. broder.

On the contrary, þ is found most at the beginning of words, where the *Icel.* has always the hard sound; as, þeod *people*: Icel. þjóð; þencan *to think*: Icel. þenkja. Þ, þ. Hanc literam proprie reor pronuntiandam ut Græcorum Θ in Θαιος, et Anglorum th in thing; Ð, ð, vero ut Angl. th in smooth, &c. Sed confunduntur hi characteres a scriptoribus.

Anglo-Saxon words ending in -ð, -uð [Eng. th: Ger. Dan. Swed. -d, -t: Icel. -ð] are all of the feminine gender; as, myrð *mirth*; treowð *troth*, a covenant; yrmð, *misery*; geoguð *youth*; gesyhð *sight*, &c.

A king's Thane, an Anglo-Saxon nobleman, was inferior in rank to an eorl and ealdorman; he was afterwards denominated a baron, *L. Wilk. p. 250: 276.* There was an inferior Thane in the Conqueror's

time, called a knight, who attended the king's Thane or Baron. The rank of a Thane, as well as the other titles of dignity among the A.-S., was not inherited, but was personal, hence it was attainable by all, even by the servile; but, before any one could be elevated to the dignity of an inferior Thane, he must be in possession of five hides of his own land, a church, a kitchen, a bell-house, a judicial seat at the burgh gate, and a seat in the witenagemot. Whoever by his industry and talent obtained these, became a Thane by right, *L. Const. Ethel. ÞOR, Þur, es; q. m. [Mr. Turner remarks, *Hist. A.-S. vol. I. p. 213* "as Thor (tor) means a mountain, his name may have some connexion with the ancient eastern custom of worshipping on mountains or hills. He was called the god of thunder, hence his name Thuner. The word seems to imply the mountain deity;" but it may be from Heb.  $\text{תר}$  tr, thr, thor to go round, circulate; hence Thor who presided over the heavens in circulation. Lye says, *Vox Celtica* dewr erat fortis, ferox, audax; unde forsan: Grk. θοῦπιος, θοῦπος, bellicosus, strenuus, impetuosus, temerarius; et A.-S. proinde Þor eadem etiam significans, cui necnon affinis plane nostra, dare. Inde autem nomina propria Thorismund, fortis manibus, &c. Habuerunt etiam Cimbri et Islandi suam Thor, vel Tor, audax, audacia; quas etiam in

compositis difficultatem, arduitatem, molestiam denotavit; ista scilicet quas non nisi Thori vel strenui alicujus, Herculeo quidem labore, superanda essent. Exemplis sint ista, Tor-aere annonæ difficultas: Tor-foera iter difficile: Tor-fein-ginn difficilis acquisitu: Tor-goetur difficilis inventu: Tor-kennast difficulter agnosci: Tor-leide arduum iter: Tor-nemur difficilis captus: Tor-synt quod facile discerni nequit: Tor-virki arduum opus, &c., v. *Wacht. Gl. Thor, Hickes's Gr. Icel. p. 71 m, 2*] THOR, one of the principal idols of the Saxons, Germans, &c. He was the same as the Roman Jupiter. Thor, being the most powerful of the gods, was set in the midst, and higher than the rest; formed like a naked man, holding in his right hand a sceptre, and in his left seven stars or planets. He presided in the air; caused thunder, winds, showers, fair weather, &c. On the fifth day of the week sacrifices were offered to Thor, that he might protect the people from thunder and storms. Hence Þors-dæg Thursday; Saxonum et aliorum veterum Septentrionalium Jupiter sive Hercules; numen scilicet in aëre præsidens, cui, peste vel fame imminente, sacrificiis humanis supplicabatur. Huic sacra quinta feria hebdomadis dicebatur. Þors-dæg Thursday; dies Jovis, Lye.

# SUPPLEMENT,

## CONTAINING CORRECTIONS AND ADDITIONS.

ANY of the words in the Supplement are from *Som. Ben. Lye*, and *Mann.*, the orthography and meaning of which are given solely on their authority. Such words were previously omitted, as a reference sanctioning their use could not be discovered. They are now inserted, with the view of supplying every assistance, as they may possibly have been found in this form by these Lexicographers, though it must be confessed that some of them appear to be only infinitives and nominatives improperly formed from other words. The inflection and meaning of all other words are confirmed by precise references.

In addition to the list at the end of the Preface, the following contractions and marks claim especial attention in the Supplement.

*-dl* denotes that the *preceding word or words*, from the commencement of the article, or paragraph, from -, are to be erased.

*dl-* that the *following word or words*, to the conclusion of the article, or to -, are to be erased.

\* that the *word or words immediately following* are corrections, and that, therefore, the printed work must be corrected to accord with what follows the asterisk.

*l.* with a numeral following, denotes the *line* from the commencement of the article or paragraph.

Thus: *p. x. l. 18*, *Getæ* or *-dl.* denotes that in page x. line 18, the words *Getæ* or are to be erased. *Æddra, ædra -dl.* \* *Æddre, ædre, an; f. a vein, drain, etc.* shews that *Æddra, ædra*, found in the alphabetical order, are to be erased, and the words following the asterisk are to be substituted in the Dictionary. *Ab* \* *the woof*, denotes that *the woof* must be substituted in the Dictionary for the erroneous explanation *a beam*. *Æfen-tid, l. 4*, *Seo* \* *æfen-tid*, shews that in the 4th line of this article, the notation must be *Seo æfen-tid þæs, etc.* and not *Seo æfen-tide*. *Æ'ra, l. 4* \* *Former*, denotes that in the 4th line of the article *Æra, Formerly* must be altered to *Former*.

*p. x. l. 38*, *Getæ* or *-dl.*  
*p. xiv. l. 4*, the chief \*writings  
 which are a translation of
